Re: Final Response for Freedom of Information Act (FOIA) Request No. 2021-DA-04879-F

This is the Office of Information Affairs' (OIA) final response to the above-referenced FOIA request, which sought a copy of the current plan for "Next Chapter USDA.gov," the project for ground-up rebuilding of the USDA.gov website, as well as a list of the 739 unique, public-facing web domains at USDA. You limited your search to records since October 1, 2020.

Your request has been processed under the FOIA, 5 U.S.C. § 552.

A search for responsive records was conducted by the USDA Office of Communications (OC) as well as the Office of the Chief Information Officer (OCIO). Responsive records totaling one hundred four (104) pages were identified.

Following a review of the responsive records, the OIA has determined that certain information contained therein should be withheld pursuant to 5 U.S.C. § 552(b)(5) and (b)(6) (FOIA Exemptions 5 and 6). Below is an explanation of the information that has been withheld.

FOIA Exemption 5 - Deliberative

FOIA Exemption 5 protects from disclosure those "inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency." One of the frequently invoked FOIA Exemption 5 privileges is the deliberative process privilege. To fall within FOIA's deliberative process privilege, the records must be both pre-decisional and deliberative; the records must precede the adoption of an agency policy and include the opinions, recommendations, or deliberations on a legal or policy matter.

In this instance, the OIA is withholding, under the deliberative process privilege, pre-decisional intra-agency discussions and briefings on agency actions and programs on issues relating to funding for the rebuild of the USDA.gov website. These items are pre-decisional in that they are antecedent to any final agency decision. These items are also deliberative in that they reflect the evolving, back-and-forth process between agency employees that is so integral to the Executive Branch decision-making process; more specifically, the development of potential recommendations made by agency advisors for use in making policy decisions.

If these pre-decisional, deliberative communications were released to the public, USDA and other Executive Branch employees would be much more cautious in their discussions with each other, and in candidly discussing and providing all pertinent information and viewpoints in a timely manner to agency decision-makers. This lack of candor would also seriously impair the Department's ability to engage in forthright, internal discussions necessary for efficient and proper agency decision-making.

FOIA Exemption 6

Exemption 6 generally is referred to as the “personal privacy” exemption. It provides that the disclosure requirements of FOIA do not apply to “personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.” Application of the exemption involves balancing the public’s interest in disclosure against individuals’ privacy interests.

The information withheld under Exemption 6 consists of information used by USDA web developers in creating, maintaining, and diagnosing errors in USDA web domains. This information qualifies as “similar files” because it is information in which the USDA has a privacy interest. The Supreme Court of the United States has held that the term “similar files” was intended by Congress to be interpreted broadly. U.S. Dep’t of State v. Wash. Post Co., 456 U.S. 595 (1982). Moreover, releasing the information could subject the USDA to interference with its web domains that would adversely affect the public’s access to online information on USDA web pages. Because there is a viable privacy interest that would be threatened by disclosure, Exemption 6 authorizes this office to withhold the information. Accordingly, we have determined that the public interest in the information’s release does not outweigh the overriding privacy interests in keeping it confidential.

You may appeal this response by email at USDAFOIA@usda.gov. Your appeal must be in writing, and it must be received electronically no later than 90 calendar days from the date of this letter. The OGC will not consider appeals received after the 90 calendar-day limit. Appeals received after 5:00 p.m. EST will be considered received the next business day. The appeal letter should include the FOIA tracking number, a copy of the original request, the OIA’s response to your original request, and a statement explaining the basis of your appeal. For quickest possible handling, the subject line of your email and the appeal letter should be marked “Freedom of Information Act Appeal” and reference FOIA No. 2021-DA-04879-F.

You may seek dispute resolution services from the OIA’s FOIA Public Liaison, Mr. Harald Fuller-Bennett. Mr. Fuller-Bennett may be contacted by telephone at 202-239-4522, or electronically at Harald.FullerBennett@usda.gov or USDAFOIA@usda.gov.

You also have the option to seek assistance from the Office of Government Information Services (OGIS). Please visit <https://www.archives.gov/ogis/mediation-program/request-assistance> for information about how to request OGIS assistance in relation to a FOIA request.

Provisions of the FOIA allow us to recover part of the cost of processing your request. In this instance, no fees will be charged.

If you have any questions regarding the processing of this request, please contact Ms. Susan Ruppel at 540-257-6467 or electronically at susan.ruppel@usda.gov or USDAFOIA@usda.gov.

For additional information regarding USDA FOIA regulations and processes, please refer to the information available online at www.dma.usda.gov/foia.

The OIA appreciates the opportunity to assist you with this matter.

Sincerely,

Alexis R. Graves

Working Capital Fund Capital Request Proposal

Section I. Identification

1. List the name of the Agency/Mission Area or Staff Office requesting funding.
 - a. Office of Communication/Digital Communications Division
2. What is the name of this investment?
 - a. USDA.gov Next Chapter
3. What is the benefit of this investment to the USDA?
 - a. This comprehensive process is a ground-up rebuild of the USDA.gov website leveraging technological advances since the last version to improve usability. By ensuring the new website works better for the user, USDA reaches the public with relevant information about USDA programs and policies. Research indicates that slow load times, broken links and outdated website architecture that requires more than 2.3 clicks to reach the desired information result in users abandoning the transaction by leaving the website. In many cases, the alternative requires calls to USDA call centers or field offices, resulting in a higher transaction cost for USDA versus self-serve through USDA.gov.
 - b. Through website redesign and content modernization, USDA looks directly at how we can sunset or consolidate underutilized websites, and all agencies are asked to take a full look at their content and records retention during the process.
4. What is the total capital amount requested for this investment?
 - a. \$1,000,000 is the current estimate, which captures the scope of a website redesign including analysis, user research, market research, development, information architecture and taxonomy design, and theming/branding. This figure comes from preliminary market research based on information from agencies on their costs and extrapolating to a project the size of USDA.gov.
5. Describe this investment in detail.

With more than 739 unique, public-facing web domains, the USDA web presence is complicated, making it more difficult for the public to navigate and quickly find the information they need. Website technology evolves very quickly, and USDA.gov undergoes a redesign and rebuild every five years to ensure its websites follow the most current Federal and industry best practices, meeting the requirements of the IDEA Act, Federal Web and Accessibility Standards, and the [USDA Digital Playbook requirements](#).

Through an iterative process, USDA developed a common Drupal web architecture used across the Department to ensure a common look-and-feel and to provide customers a consistent experience as they seek information from different program areas and agencies. This consistency requires a strong foundation based on research developed while working with customers and employees. An integral part of successfully meeting customer needs will require user-lab testing to ensure actual

Working Capital Fund Capital Request Proposal

users behavior matches USDA's projections. Partnering with the Department of Health and Human Services user experience lab, USDA ensures the proper delivery of assistance, resources, information, and programs to our customers. The research will cost \$46,900, based on 2018 costs of \$32,000 and assuming a 10 percent annual cost escalation. This is a non-capitalized expense.

Applying the research, OC will contract for Information Architecture and taxonomy creation. Based on a Market Survey and a similar, smaller project, the cost of this major section is \$150,000. This is the other non-capitalized expense.

Leveraging research and current industry best practices, USDA essentially sunsets the current version and launches a newly build website with the newly evolving technologies and improved customer delivery. USDA staff will create the design, theming, and branding of the USDA.gov Next Chapter, a cost already reflected in OC's staffing plan.

After the IT Consolidation in Fiscal Year 2020, OC no longer has dedicated staff resources to perform this work so, unlike the 2017 redesign, the work cannot be done in-house and will need to be contracted out. The entire website is reevaluated to ensure it meets a strong level of good usability user experience, from new code development and functionality to new design and branding. The work done on USDA.gov is then replicated throughout the Department by sharing code with those on the common platform, research, and design elements. OC ensures that outdated content is minimized, in turn reducing hosting costs for the Department and agencies.

After final user experience testing, USDA staff will switch over the new USDA.gov Next Chapter system while simultaneously sunsetting the current USDA.gov. The staff costs associated with this phase is already reflected in OC's staffing plan.
